WELCOME MESSAGE

Dear Colleagues and Friends,

We are pleased to invite you to the 2023 Annual Meeting of the International Society for the Advancement of Spine Surgery, Asia-Pacific Section (ISASS AP 2023), hosted by the Korean Society for the Advancement of Spine Surgery (KOSASS), ISASS Korea Chapter, from August 16 to 19, 2023, at Conrad Seoul Hotel in Korea.

Since its foundation in 2004, the KOSASS, a group of orthopedists and neurosurgeons, has been dedicated to the advancement of spine surgery through the continued research and training of surgeons, achieving remarkable academic and technical growth over the past 20 years. As the Korea Chapter of the ISASS, we successfully held APSAS8 (1st Asia Pacific Conference) in 2008 and are now excited to welcome you to our 2nd meeting in Korea.

Though ISASS AP was postponed twice due to the pandemic, we strongly believe this will not only be an excellent opportunity to share invaluable experience and insights to propel the field of spine surgery beyond Asia, but also a timely event for all orthopedic surgeons and neurosurgeons from all over the world to unite and collaborate again after the absence due to the pandemic.

This year’s AP meeting will attract over 500 experts from 20 countries. The over 270 abstracts we have received will make for a rich scientific program comprised of 54 sessions with plenary lectures, symposia and free papers featuring Robotics, Endoscopy, ERAS, Master’s Techniques, Complications, MIS fusion, Deformity, and Outpatient Surgery as topics. We also have prepared an endoscopic cadaver workshop as a pre-meeting course as well as an international observer fellowship program is planning, so young surgeons can learn the A to Z of endoscopic surgery. In addition, over 50 exhibitors from medical device companies will share their latest innovations from the forefront of spine technology.

Our host city, Seoul, is a sensation! With a history stretching back more than two thousand years, Seoul’s downtown area is home to historic 600-year-old city walls, royal palaces, fortress gates, and invaluable historical heritages. One of the largest modern metropolises in the world, Seoul is considered a leading and rising global star as the world’s most wired, ranked first in technology readiness. While you are in Seoul, we hope you enjoy all the culture, food, and entertainment that this marvelous city has to offer.

We wish you have a good time at ISASS AP 2023!

Sincerely yours,

Seok Woo Kim
President of ISASS AP 2023

ENHANCED, PREDICTABLE, PROVEN FUSION

i-FACTOR Bone Graft is the only biologic bone graft that combines a unique synthetic small peptide (P-15) and an anorganic bone mineral (ABM) to act as an attachment factor for osteogenic cells.

ATTRACT

P-15 facilitates and expedites ingrowth of bone by promoting the immigration of osteogenic cells.

ATTACH

The high affinity between osteogenic cells and P-15 enhances the physiological mechanism in which cells bind to i-FACTOR Bone Graft.

ATTACT

P-15 enhances bone formation by facilitating cellular attachment which activates natural signalling, creating a microenvironment conducive to new bone formation.
